Delphos features

- We developed a highly accurate precision grip in the screw and this precision we ensures that it does not fall off from the screw driver during surgical procedures.

All plates come with engraved Delphos logo, thus preventing possible forgeries. 

All of our plates also have their Lot Number engraved, providing traceability once required.

- All of our products are subjected to mechanical testing and inviolability of the raw material used, meeting the standards ISO 13485:2012+AC / ISO 9001:2008.
- Capability to customization, since over 90% of our manufacturing process is carried out by us.
